VKERNEL Collaborates with VMware on First Solution Acceleration Kit

Enabling the global network of VMware Authorized Consultants to build services for accelerating virtual infrastructure adoption and operational readiness

PORTSMOUTH, N.H., February 27, 2008 – VKERNEL Corporation, a provider of easy-to-use and quick-to-deploy virtual appliances for managing virtual server environments, announced today the VKERNEL Solution Acceleration Kit, a collaborative effort with VMware to quickly enable VMware Authorized Consultants (VACs) to build services for accelerating their customers' virtual infrastructure adoption and operational readiness.

With a suite of VMware certified virtual appliance for systems management that instantly solve real-world issues (cost visibility, chargeback, and capacity bottlenecks), VKERNEL was chosen by VMware to be the first vendor to deliver a solution acceleration kit. VMware rolled out the VKERNEL Solution Acceleration Kit at this week's VMworld Europe.

"As organizations scale virtual infrastructures with velocity, real-world problems, such as cost visibility, chargeback, and capacity bottlenecks, must be solved now," said Alex Bakman, founder and CEO of VKERNEL. "Our solution acceleration kit is providing the necessary tools, programs, and processes that VAC partners need to ensure successful VMware deployments for their customers."

Organizations are investing millions of dollars to rapidly grow their virtual environments. As a result, they are facing new challenges that traditional systems management solutions cannot solve fast enough. The VKERNEL Solution Acceleration Kit quickly demonstrates how fast VACs can build successful services around VKERNEL Virtual Appliance solutions.

The VKERNEL Virtual Appliance Suite for Systems Management is a set of "plug-and-play" virtual appliances designed to quickly solve real-world systems management challenges as organizations migrate to VMware virtual environments. VKERNEL products quickly enable IT groups to immediately solve today's critical pain points by providing visibility into the capacity and resource consumption of each virtual machine. VKERNEL is currently offering a Chargeback Virtual Appliance for gaining cost visibility and will soon introduce its Capacity Bottleneck Analyzer Virtual Appliance for identifying and eliminating capacity bottlenecks.

About VKERNEL Corporation

Based in Portsmouth, NH, VKERNEL is dedicated to developing best-of-breed virtual appliances that enhance performance, lower costs, and simplify management of virtual environments of all sizes. As a member of VMware's Technology Alliance Program, VKERNEL offers the industry's only VMware certified virtual appliance for analyzing capacity, chargeback, and cost visibility.
